## Timeline

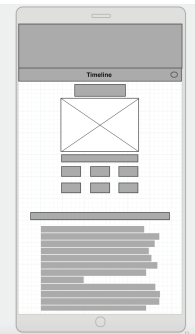

Here is the first screen people would see upon entering the app. The top is the title of the app. Below is the nav. bar where the people using it can chose how they wish to view the information. The center box might be a changing image of al the consoles.

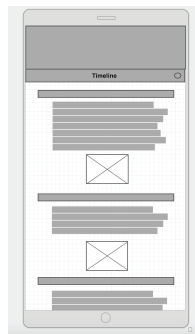

Here is what would appear if someone wants to see the video game consoles based on time. The boxes in the center are the years. The second box was clicked on and small thumbnails of the consoles appear in order.

Here is what would happen if someone were to drag their finger over one of the boxes or click once. The thumbnail would get bigger and the name of the console would be below.

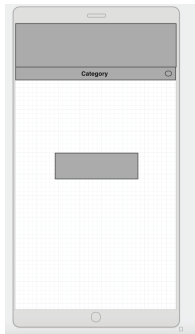

Here is the page someone would get once clicking on the page of one console. There is the year on the top followed by a picture of the console, the name of it, my rating, its popularity, the graphics quality, the brand, and the material of it.

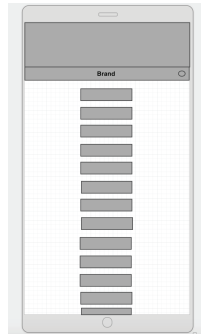

Here is we see in depth descriptions of each of the individual categories for this console.

## Brand

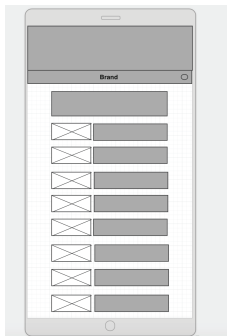

Here is the first screen people would see upon entering the app. The top is the title of the app. Below is the nav. bar where the people using it can chose how they wish to view the information. The center box might be a changing image of al the consoles.

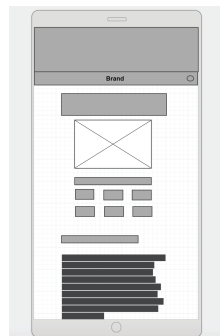

Here is what would appear if someone wants to see the video game consoles based on its brand but in alphabetical order. The boxes in the center are the different brand names.

Here is what would happen if someone wants to see the video game consoles based on its brand but more based on its popularity (which is shown by the size of the logo).

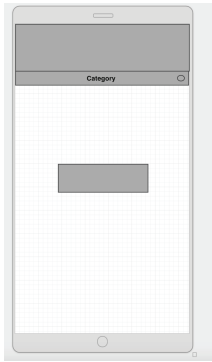

Once a brand is clicked on, there will be a list of the consoles (in alphabetical order or based on the year it was made). Next to the name of the console, there is a small thumbnail of the console.

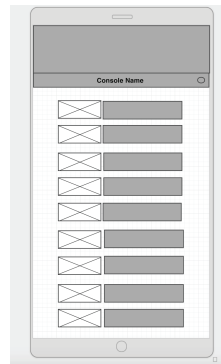

Here we see the brand of the console at the top followed by an image of the console, a bar for its name, and smaller squares with other information as it's popularity, my rating, the material, the year it was made, and the graphics quality of it.
